

A photograph of two cyclists riding on a dirt path through a forest. The cyclist in the foreground is wearing a blue and black jersey, while the one behind is in a white and red jersey. They are both on cross-country bikes. In the background, there are misty, forested mountains. The image is partially covered by a green graphic overlay on the right side.

CROSS

With their slightly profiled tyres, their suspension fork and their athletic geometry, MERIDA cross bikes like city trips as much as weekend rides on rural roads or forest tracks. The great cyclo-cross versions with drop bars and rigid forks are optimum training devices – not only for road-racing fans in winter. MERIDA – MORE DIVERSION.

CROSSWAY

CROSS

Bikes can be genuine specialists – such as sophisticated MTB machines with complex chassis systems, ultra-light racers for rides on and off the road or high-tech rockets optimized elaborately in the wind tunnel for very special pro purposes. But they do not have to! Because a bike can also be a CROSSWAY – one for all those who want it all at any time. Thanks to its profiled 28" tyres, this MERIDA likes asphalt as much as gravel while its suspension fork provides comfort and safety in every situation. Well-designed components ensure suitability for everyday use; the aluminium frame guarantees reliable durability.

As always, MERIDA offers a comprehensive range of CROSSWAY variants also in 2014 – among them lady-specific versions whose lower top tube makes it perceptibly easier to get on and off the saddle and makes each stop more comfortable due to the reduced standover height. Depending on the favoured field of application, you can opt for firm disc brakes or light rim brakes which both convince with reliable retardation power. The frames of some models are partly produced by "Hydro-forming" technology and delight – thanks to "HFS" – also with very special and exciting shapes. The hidden cable routing at the down tube provides a truly clean look. Besides its comfort feature "suspension fork", our CROSSWAY also offers optional fender, rack and kick-stand* installation. Therefore it is ideally suitable for everyday city rides, too. For even more comfort, certain variants are even equipped with a suspension seatpost as well. *Get on the saddle, start and feel good – MERIDA CROSSWAY.*
