

DAKAR

KIDS

Children have a mind of their own: Permanently, they produce unforeseen ideas and try out all sorts of activities. Parents appreciate this as long as they can be sure that their kids do well with their unbridled play instinct. That's why all children's and youth bikes made by MERIDA – ranging from trainer bikes to full-suspension MTBs – guarantee especially one aspect: undisturbed enjoyment of playing and growing up.

All MERIDA kids' and youth bikes of MY 2014 share a highly reliable centrepiece: An outstandingly robust and precisely manufactured aluminium frame ensures that even the hardest treatment cannot harm the bike's construction. For the youngest riders, we recommend our DAKAR 612 whose name matches its tiny but very sturdy 12" pneumatic tyres. A reliable front brake, an effective chain guard and removable stabilizers are essential companions on the first biking metres. The identically equipped DAKAR 616 rolls on 16" pneumatic tyres. Up from the 620 series, kids enjoy their own MERIDA with an age-appropriate derailleur system and an additional rear brake – without any stabilizers. The 24" models already show characteristics of serious biking: Our DAKAR 624-SUS offers a sturdy full-suspension chassis for tougher rides also off the paved road. Moreover, MERIDA delights all parents of budding bike sport enthusiasts with the new DAKAR 624 RACE now. This great youth bike has been developed for racing purposes and convinces with an overall concept focussing on lowest total weight possible. *Playing, learning, cycling – MERIDA DAKAR.*

„It's great when kids get in the saddle as early as possible and with maximum enthusiasm – because each minute they ride their 'bone-shaker' is time spent usefully. That's why we at MERIDA create youth bikes delighting with top functionality and especially with a design which awakes an appetite for cycling.“

HANS-CHRISTIAN BRIX, Designer MERIDA
